

# GaTech MXNet talk

## Possible contact points

- ML Courses
  - CS7641 (Charles Isbell) (Grad and undergrad both take it) (Conceptual and practical, less mathematical)
  - CS7646 (Tucker Balch) ML for Trading
    - Side note - founder Lucena
- Groups
  - ML@GT
    - Seminar - <http://ml.gatech.edu/tags/seminars>
  - IDEAS (Institute for Data Engg and Science)
  - Business Analytics Center
  - Library
- Brown Bag
  - GVU Center - <https://gvu.gatech.edu/events/upcoming>

## Abstract

A truly open source project that provides state-of-the-art models out of the box. Relatively unheard of ML framework that is proven to be scalable, performant and easy-to-use. An Apache-incubator project supported by Amazon, an alternative to Tensorflow, Keras and PyTorch - Apache MXNet.
